SUMMARY

Backend / Full Stack Engineer with **2 years of experience** building scalable backend systems at **Light & Wonder**. Proven experience in **backend development**, **API design**, **architecture modernization**, **release ownership**, and delivering production-ready software across global markets.

EDUCATION

Dayananda Sagar College of Engineering, Bengaluru
B.E. in Computer Science CGPA: 8.89

Karnataka, India
(2020 – 2024)

EXPERIENCE

Associate Software Engineer | Light and Wonder

Aug 2024 - Present

- Designed and deployed **60+ REST APIs using ASP.NET Core**, enabling migration from a monolithic **MVVM** architecture to a **scalable Web API system**.
- Built a **wizard-based bulk table provisioning system** enabling scalable gameplay configuration and reducing setup time by **90% (2 days → few hours)**.
- Contributed to migration from **.NET Framework to .NET Core** and designed a **database abstraction layer** enabling **runtime switching between MSSQL and PostgreSQL**, supporting **Linux deployments** and improving system scalability and flexibility.
- Developed an internal **load testing and monitoring tool** using **React.js, Python, and MSSQL**, reducing manual performance analysis effort by **50%**.
- Designed and built a **Python-based deployment automation tool** for SMC, eliminating manual steps and reducing deployment time by **30 minutes per deployment**.
- Migrated configuration logic, feature toggles, and UI visibility rules from codebase and SQL to **JSON-based Config SRM**, enabling dynamic UI control via a rule engine and reducing QA rebuild cycles.
- Diagnosed and resolved **production-critical issues** across AdminConsole and ETS Server, improving system stability in live deployments.
- Contributed to **feature development, code reviews**, and delivered production releases across **US, China, Korea, and Singapore** gaming markets.

Software Engineer Intern | Light & Wonder

Mar 2024 – Jul 2024

- Developed **FitNesse automation tests for X-Series protocol**, improving regression testing coverage by **30%**.
- Modernized **Operator Menu** by replacing **50+ legacy handlers** with **WebSocket handlers** in **C++** and updating UI using **React and TypeScript**, improving response time by **30%**.

TECHNICAL SKILLS

Languages: C/C++, C#, Python, JavaScript, Typescript, Java
Frameworks: ASP.NET Core, .NET, MVC, React, Node, Nest
Databases: MSSQL, PostgreSQL, MongoDB
Tools: Git, Claude, Copilot, Visual Studio, Perforce, Docker, Postman
Platforms: Linux, AWS, JIRA, Confluence

PROJECTS

FoodHub [\(Repo\)](#) [\(UI\)](#)

[\(React.js, Node.js, MongoDB\)](#)

Developed a full-stack food delivery platform with **REST APIs** supporting real-time ordering and status updates.

DeCharge [\(Repo\)](#) [\(UI\)](#)

[\(React.js, TailwindCSS, Ethers.js\)](#)

Built a **Web3** EV charging station discovery platform using **blockchain** smart contracts.

AWARDS & CERTIFICATIONS

- Best Project Award** — Project Open Day 2024 (among **71 teams**), DSCE [\(Link\)](#)
- Participated in multiple hackathons including **BITS Pilani**, **Flipkart Grid**, **TVS Credit E.P.I.C 5.0**, building real-world applications including a food donation platform **FeedIndia** and a nutrition tracking Android app **Healthcode**. [\(Link\)](#)
